

Work Scope

European Battery Alliance Manager

The Role

Based on our leading innovation activities within energy storage, EIT InnoEnergy was asked by the EU Commission, to develop the framework to enable the creation of a European battery industry. It was done with new and existing European industrial representatives from all parts of the battery value chain. The result was:

1. A set of recommendations to enable Europe to capture the rapidly expanding battery market, estimated at 250B€ annually from 2025 onwards.
2. A subset of action to implement the recommendations.
3. The formation of the European Battery Alliance (EBA).

Since this request, EIT InnoEnergy has led the industrial work stream (known as EBA@250), which now includes 250+ stakeholders from across the entire value chain (the so-called EBA Ecosystem). These stakeholders have co-created **49 actions** that have been identified by the **European Battery Alliance** as crucial, to enable Europe to become the winner in batteries.

Further details are available on <https://www.eba250.com/>.

The EBA@250 is now entering in to the implementation phase, identifying concrete projects that operationalize the 49 actions. For this purpose, we now seek an EBA Manager to operationally drive the implementation of this ambitious program. In this role you will carry the overall responsibility and report to the EIT InnoEnergy EBA Board. The responsibility includes two main areas, the EBA ecosystem and Project creation & execution. You ensure the best possible implementation of the 49 actions and you will arrange an effective and efficient management of the required resources.

Responsibilities

- You report to the EIT InnoEnergy EBA Board and lead the Operations office and its Project Managers and the EBA Ecosystem Manager and team.
- Management of the Implementation of EBA activities and projects: together with the project managers you will take ownership of the projects, ensure results as defined in the business case and act as a central focal point for aligning all interfaces.
- Overview, monitoring and reporting of the implementation status (on all actions and projects) and initiate actions in case of project deviations.
- Act as primary point of contact for customers and wider stakeholders. You manage and facilitate prompt, meaningful communications with all stakeholders to inform on or resolve financial, technical, commercial or other topics.
- Ensure the availability and management of resources (team, financial).
- Manage legal and supply chain matters, including contracts with suppliers and partners.
- Effectivity and efficiency drive and monitor the implementation and use of resources.
- Arrange for structured implementation planning (scheduling, financial and human resources) and ensure best practice sharing.

The Person

- Extensive experience in managing large, complex and dynamic international organizations, projects and teams
- Experience from setting up and managing European project consortia
- Experience from energy industry, utilities and markets
- Understanding of the ongoing energy transformation and underlying market forces
- Experience from cross industry cooperation a plus
- Extensive leadership skills and experience
- International and multicultural experience
- Experience leading contract negotiations
- As a person you like opportunities, challenges and eager to achieve results
- You enjoy and see a multicultural environment as an asset
- Excellent command of English, written and verbal.
- Other language skills is an advantage

The Company

EIT InnoEnergy is the innovation engine for sustainable energy across Europe. For more details please relate to **www.innoenergy.com**

The position

Full time, 1 year with possibility of 1 more year of extension if EIT InnoEnergy is satisfied with the work and if budget is available and the position is needed, located in Stockholm office with extensive international travel.
